

It is our great pleasure to announce a Biochemistry symposium on "Rejuvenating Science in Zimbabwe" to be held in Harare, Zimbabwe, on 26th October 2011. The symposium will highlight cutting-edge advances in all major disciplines of biochemistry with special emphasis on Biochemistry in general in the light of reawakening science research in Zimbabwe. This one-day event will feature recent findings from leading industrial and academic experts in the field, in the form of short lectures, oral talks and posters. The symposium will be unique in promoting modern biochemical research, with both basic and industrial scientists in research.

The symposium will provide a forum for assessment of the challenges involved in research in Zimbabwe will bring together leading biochemists, medicinal chemists, pharmacologists, biotechnologists, agricultural experts and other allied professionals to discuss and present the latest important developments in biochemistry and its significance in improvement of Zimbabwe.
